Hager Companies offers a complete line of thresholds & weatherstripping products for virtually any type of door application. What’s more, each meets or exceeds ANSI-grade quality, durability, and performance levels. For enhanced levels of safety and security, we also offer intumescent products for positive pressure solutions, including edge sealing and smoke control systems. All of which make Hager threshold, weatherstripping, and door bottom products an excellent choice for standard or custom applications in schools, hospitals, office buildings, and more.

GENERAL INFORMATION

PRODUCT PRESENTATION
Dimensions on stainless steel extrusions may differ slightly than those detailed. Questions regarding any dimensions should be directed to Hager Companies Customer Service.

Drawings or illustrations used in the catalog are subject to change without notice. Questions on any dimensions should be obtained by contacting Hager Companies Customer Service.

FABRICATION OPTIONS
- Bevel one edge of threshold
- Rip one edge width of threshold
- L-notch both ends of threshold
- U-notch both ends of threshold
- Tack weld one line of threshold
- Pan for water return of threshold
- Sure Step Non-Slip Abrasive Coating – A rugged, durable coating that can be applied to all Hager Companies’ metal thresholds. Ideal for thresholds being used in wet, oily or corrosive environments.

MATERIALS & FINISHES
Metals
All aluminum extrusions are of alloy 6063-T5.

For stock finishes, refer to the code listed below each individual item throughout the catalog. Please inquire for the availability on nonstock finishes.

ORDERING INFORMATION
When ordering, please specify by product number, length, quantity, finish and fasteners required. Thresholds & weatherstripping are fabricated in standard sizes with 1/2” (12.7 mm) extra on thresholds 48” (1219.2 mm) and under.
Anodized thresholds are fabricated in standard sizes with 1/4” (6.35 mm) extra on thresholds 48” (1219.2 mm) and under. Thresholds over 48” (1219.2 mm) are supplied with 1” (25 mm) extra length for fitting. Anodized thresholds over 48” (1219.2 mm) are fabricated in standard sizes with 3/4” (19.05 mm) extra length for fitting. Exact lengths are available upon request (specify CTEL).

Example: 891S V 36 x 84 MIL

Gaskets
Gasketing is available in a wide variety of materials. Vinyl is an economical choice and remains flexible down to -40°F (-40°C). EPDM gasketing is supplied both as a solid (dense) and as a closed cell sponge with a tough outer skin. It remains flexible down to -50°F (-49°C). Silicone gasketing provides the best resistance to cold by remaining flexible down to -70°F (-57°C). Refer to the price book for a list of available replacement gaskets. Gasketing codes are listed below.

FASTENERS

Standard
All products are furnished with appropriate fasteners as listed, except where noted. Most thresholds are furnished with mounting holes and #10 x 1-1/2” flat head sheet metal screws. Most weatherstripping products are furnished with slotted holes and #6 x 5/8” pan head sheet metal screws.

Optional

Thresholds
- #10 wood screws and plastic anchors
- #10 wood screws and lead anchors
- #10 machine screws and lead anchors
- #10 stainless steel wood screws
- #10 stainless steel wood screws and plastic anchors
- #10 stainless steel wood and lead anchors
- 1/4-20 stainless steel machine screws and lead anchors
- 1/4-20 machine screws and lead anchors
- 1/4-20 x 2” flat head sleeve anchor
- #10 torx sheet metal screws
- #10-24 x 1-1/2” stainless steel torx machine screw with lead anchor
- #10-stainless steel spanner head wood screw with lead anchor
- Cast-on anchors (cast products only)
- Tap-con type (1/4” x 1-3/4”)

Weatherstripping
- #6 x 5/8” pan-head stainless steel screws
- #6 x 5/8” self-drilling (TEK) screws (Steel-zinc plated)
- #6 x 5/8” pan-head torx sheet metal screws
- #6 x 5/8” stainless steel self-drilling (TEK) screws
- 1/4 - 20 x 1-1/4” sex bolts
- Two-way self-adhesive tape

GENERAL INSTALLATION INSTRUCTIONS FOR PRESS-ON PRODUCTS:
- Product returnable within first 6 months after purchase date
- Installation should take place after construction has been completed, and final cleaning has taken place
- The frame should be cleaned; isopropyl alcohol is recommended
- Not recommended for unsealed or porous applications
- Do not store these products in extreme heat/cold or for prolonged periods of time

CERTIFICATIONS

Handicap Accessibility
Products denoted by this symbol are designed for applications where handicap accessibility is specified. These products are no greater than 1/2” (12.7 mm) in height and have no more than 1/4” (6.3 mm) vertical rise or with slope proportions no greater than 1:2 slope. Offset floor conditions greater than 1/2” (12.7 mm) require a 1:12 slope.

Air Infiltration
Products denoted by this symbol have been tested with air/smoke infiltration, all within the (0.500 cfm/ sq. ft. for double doors and .300 cfm for single doors) maximum allowable leakage at a pressure of a 25 mph wind (1.56 psf). The tests were conducted in accordance with ASTM test procedures and meet ASTM: E283.

Sound Tested
Products denoted by this symbol have been sound tested and received the appropriate STC rating. The tests were conducted in accordance with ASTM test procedures and meet ASTM: E90 & ASTM: E413.

BHMA Certified
BHMA Certification Program was developed as a means for manufacturers of builders hardware to indicate compliance with American National Standards sponsored by BHMA. Participating manufacturers certify compliance with the standards based on a continuing program of passing the prescribed tests.
Underwriter’s Laboratories
Products denoted by this symbol are classified and labeled by Underwriter’s Laboratories, Inc.® as gasket material for use on listed steel frames and/or classified swinging type fire doors of the hollow metal or steel covered composite type rated up to 3 hours, or wood core fire doors rated up to 1-1/2 hours. Test results show these products do not adversely affect the fire resistance of the door or frame according to its UL rating. All products are regularly checked under a labeling and listing service. The clearance between the door and the frame and between the meeting edges of doors swinging in pairs shall be 1/8” ± 1/16” (3.18 mm ± 1.59 mm) for steel doors and shall not exceed 1/8” (3.2 mm) for wood doors.

- UL 10C (Positive Pressure) complies with IBC, NFPA 80 and NFPA 252 for hollow metal fire doors rated up to 3 hours and wood fire doors rated up to 90 minutes.
- UL 10B complies with NFPA 80 and NFPA 252 for hollow metal fire doors rated up to 3 hours and wood fire doors rated up to 90 minutes.

Notes: Ratings on some items may vary and are noted on the individual products. For a more complete look at classifications on individual products, please visit www.ul.com/database and reference R13647.

THE INTERNATIONAL BUILDING CODE (IBC)
The International Building Code (IBC) requires swinging fire doors to be tested in accordance with ANSI/UL 10C or NFPA 252, with the neutral pressure level established at 40 inches or less above the sill. This causes “positive pressure” forces against the door assembly above 40 inches. The result is hot gases and smoke leak out between the door and frame above this level, posing a serious threat to life-safety; and on wood doors rapidly deteriorating the integrity of the door edges, requiring either a built-in or supplemental “edge sealing system” to pass the test.

Fire door assemblies in corridors and smoke barrier walls are required to be smoke and draft control assemblies tested in accordance with UL1784 allowing a maximum air leakage of 3 cubic feet per minute per square foot of door opening at ambient temperature (75°F) and elevated temperature (400°F). These assemblies require the letter “S” on the fire rating label of the door indicating compliance “when listed or labeled gasketing is also installed.”

Below are some key phrases that indicate positive pressure requirements:
- IBC 2003 (and later) - International Building Code
- UL 10-C - Positive Pressure Fire Test
- ASTME-2074-00 - Fire Test of Door Assemblies
- Shall meet positive pressure requirements
- Intumescent seals - imply positive pressure

The www.iccsafe.org web site of the International Code Council (ICC) has a map of code adoption by state. This site is frequently updated and by clicking on a state, you can see what codes they have adopted.
New and existing fire doors are classified/labeled by one of the following designation systems:

- Hourly rating designation
- Alphabetical letter designation
- A combination of both

Fasteners: #10 x 1-1/2" Flat head sheet metal screws, other screw types and anchors available upon request.

Options: Available with Sure Step non-slip abrasive coating

Notes:
- MIL finish thresholds are supplied with zinc plated screws
- Color anodized thresholds are supplied with screws plated to match

Material <not specified>
Threshold interlocks with hook on the bottom of the door for a superior seal against wind and rain

**Fasteners:** #10 x 1-1/2” Flat head sheet metal screws, other screw types and anchors available upon request

**Options:** Available with Sure Step non-slip abrasive coating

**Notes:**
- MIL finish thresholds are supplied with zinc plated screws
- Color anodized thresholds are supplied with screws plated to match
- Thresholds are supplied with the 701S J-Hook
- Metal doors must have flush bottom for proper J-hook installation

### 600S

**Finishes:** MIL, DBA, GLD  
**Certifications:**

### 701S

**Finishes:** MIL  
**Fasteners:** #6 x 7/8” nail  
**Certifications:**

**Notes:** J-Hook interlocks with threshold to seal against wind and rain

### 604S

**Finishes:** MIL, DBA  
**Certifications:**

---
A heavy duty aluminum threshold with silicon carbide granules integrally cast into the surface. Ideal for high traffic areas where maximum durability is required. The abrasive, skid resistant surface works well under wet, dry or oily conditions.

Fasteners: #1/4" flat head zinc plated sheet metal screws with lead anchor

Options: Cast-on anchors available upon request

Notes:
- Furnished with countersunk holes
- Cut with a reinforced abrasive plain surface disk, 1/8" thick, either aluminum oxide or silicon carbide
- Maximum length available is 8 feet, not available for floor closers
- Available in 4", 5" and 6" widths

**WEATHERSTRIPPING - PRESS-ON GASKETING**

### Combination Edge-Sealing System with Smoke Control
Field applied edge-sealing system gaskets with integrated smoke fin. Add to the frame of a B, C or 1/3 hour labeled fire door.

**719**

- Finishes: Charcoal, Brown
- Category: H, G, J
- Certifications: 
- Notes:
  - Requires 1/8" clearance
  - Not recommended for door frames with 1/2" stop or less
  - Recommend 3/16" backset - door side hinge
  - Intumescent material
  - Thermoplastic Elastomer (TPE) material

**720**

- Finishes: Charcoal, Brown, White
- Category: H, G, J
- Certifications: 
- Notes:
  - Thin design for doors and frames with tight tolerances
  - Intumescent material
  - Thermoplastic Elastomer (TPE) material

**722**

- Finishes: Charcoal, Brown
- Category: H, G, J
- Certifications: 
- Notes:
  - Requires 1/8" clearance
  - Recommend 3/16" backset - door side hinge
  - Intumescent material
  - Thermoplastic Elastomer (TPE) material

### Adhesive Mullion Seal

**710S**

- **1/8"** [3.2]
- **1 9/16"** [40]

WEATHERSTRIPPING - DOOR BOTTOMS

Provides a seal against weather. For best results, use in conjunction with a threshold.

Fasteners: #6 x 5/8" pan head sheet metal screws
Notes:
- Lengths up to 48" are supplied 1/2" over their stated size to allow for fitting
- Lengths over 48" are supplied 1" over size
- "Cut to exact length," may be specified
- Constructed of strong extruded 6063-T5 aluminum

WEATHERSTRIPPING - AUTOMATIC DOOR BOTTOMS

Provides an outstanding seal against drafts, light, smoke and sound. For best results, use in conjunction with a threshold. When door fully closes, the gasket extends downward to provide a seal. Gasket retracts when door is opened.

Fasteners:
- #8 x 1-1/4" pan head sheet metal screws furnished with surface mount types
- #6 x 5/8" Pan head sheet metal screws furnished with mortise types

Notes:
- Furnished exact length as stated.
- Furnished with end cover and strike plates
- DBA/GLD end caps available on MIL or CLR devices (Not available on 742S)

730S - Mortise

Available order lengths: 12" to 60".
Lengths 16"-29" may be trimmed for fitting (2" maximum).
Lengths 30"-60" may be trimmed for fitting (5" maximum).

742S - Mortise

Available order lengths: 12" to 60".
Lengths 16"-29" may be trimmed for fitting (2" maximum).
Lengths 30"-60" may be trimmed for fitting (5" maximum).

743S - Mortise

Available order lengths: 12" to 60".
Lengths 16"-29" may be trimmed for fitting (2" maximum).
Lengths 30"-60" may be trimmed for fitting (5" maximum).

740S - Surface

Available order lengths: 12" to 60".
Lengths 16"-29" may be trimmed for fitting (2" maximum).
Lengths 30"-60" may be trimmed for fitting (5" maximum).

747S - Surface

Available order lengths: 12" to 60".
Lengths 16"-29" may be trimmed for fitting (2" maximum).
Lengths 30"-60" may be trimmed for fitting (5" maximum).

For use on hollow metal door:
Available order lengths: 24" to 60".
24" cannot be trimmed.
36" to 48" can be trimmed up to 3".
All other sizes can be trimmed up to 1".

Notes:
- Available order lengths: 12" to 60".
- Lengths 16"-29" may be trimmed for fitting (2" maximum).
- Lengths 30"-60" may be trimmed for fitting (5" maximum).

Notes:
- Available order lengths: 12" to 60".
- Lengths 16"-29" may be trimmed for fitting (2" maximum).
- Lengths 30"-60" may be trimmed for fitting (5" maximum).
WEATHERSTRIPPING - DOOR BOTTOM SWEEPS

Typically door bottom sweeps are used on the exterior of an outswing door.

Fasteners:  
#6 x 5/8" pan head sheet metal screws furnished with mortise types

Notes:  
- MIL finish weatherstripping is supplied with zinc plated screws
- Color anodized weatherstripping is supplied with screws plated to match
- Stainless steel weatherstripping is supplied with stainless steel screws
